

Your Eyes are a Window to your Health

Annual eye exams are vital to maintaining your vision and overall health. We offer the **Optomap/Retinal Photography** as an important part of our eye exams. The Optomap Retinal Exam produces an image and provides us with a wide view to look at the health of your retina.

Many eye problems can develop without any symptoms. Early detection of eye diseases and disorders are crucial to prevent loss of vision at any age.

An Optomap Retinal Exam provides:

- A scan to show a healthy eye or detect disease.
- A view of the retina, giving your doctor a more detailed view than she can get by other means.
- The opportunity for you to view and discuss the Optomap image of your eye with your doctor at the time of your exam.
- A permanent record which allows us to view your images each year to look for changes.

Please indicate your preference below:

_____ I elect to have digital retinal photography

_____ I am not sure but would like to discuss its benefits for me

_____ I decline

NOTE: In most cases you won't need to be dilated if you have retinal imaging done.
